

**Limelight multievent lighting
installation Fairwater Estate,
Sydney, 2017**

Commissioned by Frasers Property Australia, their Brief was specific, to illuminate Fairwater Estate employing a flexible multi event lighting system which could be used throughout the year to enhance specific holidays and celebrations. A further key requirement was for the system to be low maintenance, straightforward and accessible by the local maintenance team, allowing easy access to the control panel when needed.

Limelight Australia achieved this by providing a customised installation incorporating 100 watt RGB (Red, Green Blue) light fixtures, a wireless DMX control network and a DMX touch screen controller which was retrofitted to existing light poles. To ensure integration with the existing light poles all custom metalwork was powder coated.

Currently the system has seven customised preset lighting “scenes” or “stories” incorporating colour and movement with the capability of storing and recalling up to 500 presets.

The project has been well received, and aside from the obvious aesthetic appeal, a further benefit is that the installation offers the parkland fantastic evening illumination, providing the community with a greater sense of security.

A system like this is an effective and smart way of getting the most out of one installation as it lends itself to events all year round such as, Christmas, Vivid, Diwali, Local events and Cultural events

If you have been thinking about installing a new system or upgrading an existing public lighting please feel free to contact us for further information.
