

## LED Lighting, Theming, Design, Supply, Installation and Maintenance

Established in 2000, Limelight Australia is a decorative and professional lighting, audio and electrical company.

With over 15 years of experience, and projects spanning public and private sectors, Limelight can manage your job from conception to completion.

Our key speciality is architectural, landscape and street scape lighting.

Working closely with the client, Limelight is committed to achieving a long term and flexible installation incorporating quality, cutting edge LED technology capable of addressing multi-event lighting requirements.

Limelight's body of work has included:

- Architectural Lighting
- Public Malls
- Christmas Installations
- Exhibitions
- Function Rooms
- Landscape/Streetscape lighting

*Testimonial: "Limelight provided design assistance and installation of feature lighting to Ernest Place, Crows Nest. Their professional staff and subcontractors installed a customised LED colour changing lighting scheme to six trees with minimal disturbance to the busy pedestrian and cafe area. The decorative lighting has been received well by the community and I would be happy to consider them for future projects."*

**Adam Deutsch, North Sydney Council 2015**

- Projection Systems
- Stage & Dance Floor
- Sports Bar

*Testimonial: "Limelight won the Canada Bay Tender for the Majors Bay Road decorative lighting project. They worked with Council Officers to produce a lighting system that was potentially vandal proof, low voltage and low maintenance with the capability to produce multi event lighting themes with minimal disturbance to the existing mature age gum trees. The installation successfully filled the brief and I would definitely consider them for any upcoming work."*

**Stephanie Kelly, Canada Bay Council 2015**

We appreciate the aesthetics, but we are also practical. From advising on a specific brief and budget, providing options on designs, concepts and themes to installation and maintenance - we do it all.

All insurances are current.
